OBJECTIVE

To be a passionate Cybersecurity Enthusiast , a SOC analyst and Consultant dedicated to protecting digital systems and solving complex security challenges. I will thrive under pressure, enjoy working in collaborative teams, and love taking on hands-on cybersecurity projects such as penetration testing, network defense, and digital forensics to strengthen organizational security.

PROFESSIONAL EXPERIENCE

CYBERSECURITY PROJECTS

Wilson's home lab, January 2025– Present

- Set up my own home lab using virtual machines and enganged in tackling machines and getting their flags.
- Phishing Detection Tool: Created a web-based system that identifies phishing URLs using machine learning.Secure File Transfer Application:
- Network Intrusion Detection System (IDS): Developed and configured a Python-based IDS to monitor and detect malicious traffic.
- Log based detection and forensic tool: Developing a SIEM tools to monitor logs for a system

LABS EXPERIENCE

Try hack me and Hack the box, August 2024– Present

- Typed documents such as correspondence, drafts, memos, and emails, and prepared 3 reports weekly
- Conducted penetration testing on virtual environments using Kali Linux, Metasploit, and Wireshark.
- Performed malware analysis, network monitoring, and incident response activities.
- Configured firewalls, routers, and IDS systems to strengthen network defences
- Practiced digital forensics and log analysis to trace system breaches

CTF CHALLENGES AND CERTIFICATES

PICO CTF , Try hack me and Hack the box, Cisco 2024 – present

- Actively participated in hands-on cybersecurity Capture The Flag (CTF) challenges focused on real-world security scenarios
- Solved challenges involving Linux fundamentals, networking, cryptography, web exploitation, reverse engineering, and basic binary exploitation.
- Used common security tools such as Nmap, Burp Suite, Metasploit, Wireshark, Hydra, and Linux command-line utilities
- Improved understanding of ethical hacking principles , penetration testing methodologies and defensive security awareness.

- Acquired some certificates from cisco eg ethical hacking where I continue to learn more about security, networking and coding.
- Acquired Ethical hacking certificate from cisco from Cybershujaa and Network essentials from Cisco

EDUCATION

KCA UNIVERSITY – Nairobi, Thika road
Bachelor of science ininformation security and forensics,Ongoing

Mumbuni boys High school – Machakos, Mumbuni
Kenya Certificate of Secondary Education, 2022

Mary immaculate Educational complex – Nairobi, Bahati
Kenya Certificate of primary Education, 2018

ADDITIONAL SKILLS

- Expert in Microsoft Office, with a focus on Excel
- Web and tech savvy, require little to no training
- Linux System Administration (Basics) – user management, permissions, services, process monitoring
- Networking Fundamentals eg TCP/IP, DNS, DHCP, HTTP/HTTPS, basic routing concepts
- VirtualBox usage for lab environments and testing(Virtualization)
